

Hello everyone,

One month has passed since I arrived at Canada. I'm going to write this report about 10 times from this month and I would like to try writing them in English. There might be some incorrect expressions, but please give me a break.

Now then, I'll write about three topics, about the area where I live, my host family and the host school. I live in a small town in the middle of Vancouver Island. We have both of mountains and beach. There are also a lot of wild animals such as rabbits, dears and squirrels. We can see them even in the town! The nearest shopping mall is a 10-minute drive from my town. The main means of transportation around here is cars and buses (There is no trains!). Fortunately, I can go to my school on foot.

My host family is so kind and things are going well with my host family. We are family of 6, host mother, father, younger sister and brother, and another international student from Germany. I was surprised but it's normal here to have two international students in one family.

My school has some international students besides me. They come from diverse backgrounds, especially Spain and Mexico

. We had some event among international students in last month and I could make many friends. In addition, I started some new things such as cross country running, playing fruit, crochet and singing at school. I have many things I want to write but I'll report about them in next time.

Although my host mother told me that we usually have lots of rain on September, it's been nice weather since I came here. I think I'm lucky. Besides that, I came here thanks of many lucks. I'll try to do my best not to waste such a precious opportunity.

See you next month,
